EDUCATION

KING MONGKUT'S INSTITUTE OF TECHNOLOGY LADKRABANG (KMITL)

-- Bachelor of Engineering in Software Engineering (International Program)

2022 - 2025

SKILLS

- WEB DEVELOPMENT : HTML, CSS, JAVASCRIPT, REACT, TYPESCRIPT, PYTHON, FASTAPI,
- MOBILE APP DEVELOPMENT : FLUTTER
- DATA STRUCTURE AND ALGORITHMS. : PYTHON, JAVA,
- LANGUAGE : ENGLISH, MYANMAR

EXPERIENCE

APRIL 2024- JUNE 2024

INTERNSHIP

- FRONTWARE INTERNATIONAL: FLUTTER FRONTEND DEV Position

PROJECTS (RECENT)

Blog Editor project (Web programming coursework)

HTML, CSS, Javascript, EditorJS plugins, Tailwind-Flowbite (UI), python (FastAPI)

Oct 2023- Nov 2023

Developed a **blog editor** project along with **redesigning whole KMITL SE department website**

- **Designed** UI pages (Home, About, Program, Admission, Blog) to be aligned with UX principles
- **Created** CRUD API endpoints, allowing admin to create, read, update, delete blogs, **and** upload/update/delete blog images which later stored in **ZODB object database**,
- Used **Fetch** api to get these endpoints to observe/update the blogs automatically on the redesigned SE website

More info - https://github.com/Smh1111/SE_website

T-Rex dino game (C/Assembly Raspberry PI coursework)

C, SDL library, assembly, Raspberry Pi

Oct 2023- Nov 2023

Developed a **small pixel-based game in assembly and C**, exactly like the T-rex dinosaur game which can be played on browsers when offline.

- created a **simple side-scrolling** game, inspired by the popular "Chrome Dino Game." using **Assembly language and the SDL** (Simple DirectMedia Layer) library
- implemented **controls for character movement** that involves handling user input, updating the character's position, and managing animations
- generated **random obstacles** (cacti), **collision detection**, **infinite background loop** technique and scoring distance travelled.

More info - <https://github.com/Smh1111/T-rex>

Book Finder App (Object oriented programming coursework)

C++, Qt Framework, Qt Creator

April 2023- May 2023

Developed a **Book Finder App** by using **Google Books API** to access a database of books, enabling users to browse for the books based on query criteria such as **title, author, ISBN, or keywords**.

- Read **Google Books API** docs, implemented **JSON parsing logic** for extracting data from request/response JSON, and **extracted data** about books (for eg. title, authors) with OOP approach (classes, objects, inheritance)
- Integrated **Qt framework** successfully to manage UI along with network request to the API, **documented** source codes with **Doxygen** which **increased collaboration speed by 20%**, allocating more debugging time.

More info - <https://github.com/Smh1111/BookQtcreator>

Lucky Uno card pick (Python coursework)

Python, tkinter

Dec 2022- Jan 2023

Developed a **uno card picker game**, which can be played in **player mode** or **AI mode**

- Implemented UNO card images to **represent python card objects**, handled the **interaction** with cards buttons in python **tkinter**, and ensured that these cards have **interaction sounds system and AI system**
- Set up the background color picker tool for **customization**, prepared win/lose messages for winning the game, and demonstrated knowledge in **simple game logic**

More info - https://github.com/Smh1111/Uno_Game_Python

EXTRACURRICULAR ACTIVITIES

- **Teaching assistant at Introduction to logic course** : provided comprehensive tutorials for each assignment, recorded offline video sessions for better understanding of the lectures and topics .
- **Participant at Asean Data Science Explorers 2021 competition** : created a storyboard using SAP analytic tool to showcase the trends of E-waste management aligned with UN Sustainable Development Goals (SDGs)
- **Build-on Thailand, Pattaya 2023 (organized by Depa, AWS, KrungThai, central tech)**: brainstormed solutions for banking sectors and pitched new solutions to the digital banking process fostering facial recognition features in banking apps.
- **Arduino robotic competitions**: build arduino robotic cars with sensors that can detect objects, sound, vibration with electric motors and micro-controllers.
- **Entrepreneurship Training Workshop (UNCTAD certified)**: gained insights on how start-up business works on this training program

AWARDS

- ASEAN-INDIA Hackathon 2021 winner
- 2018 Ooredoo Hackathon Best Business Idea Winner, Yangon, Myanmar
